

FABIEN BRUNET

SOFTWARE ARCHITECT
FRONTEND DEVELOPER
SPEAKER

LATEST WORK EXPERIENCE

Allianz Technology
October 2019 - Now

Paris, Barcelona, Munich

Implementation of a micro frontend architecture at Allianz in a context of verticalization by domain. During these 4 years I was able to set up simple architectures based on simple page applications, but also complex architectures based on the micro frontend. During these years I worked in an agile context with 4 to 35 developers.

I had the opportunity during this experience to keep the developer community alive for 3 years within Allianz France and enabled the creation of a developer community throughout the Allianz world. These communities have enabled me to learn and discover many new development, agile and architecture practices.
